Westminster workstations have USB and Firewire ports so users can capture data from their cameras into the computer for processing...

No Camera? No Problem! The Xsane application will allow you to scan pictures or slides. This application can work with GIMP to automatically bring in pictures for immediate editing...

Say Cheese - Literally! This appropriately-named application allows users to take pictures and videos from our HD webcam...
The best way to describe the GIMP graphical editor is like Photoshop on multi-vitamins!!
Full imaging tools and additional filters are available to transform your picture into a work of art!!

CAUTION:
You are only limited by your imagination!! William Saul (running away from a dinosaur) would certainly agree with you...
